MCON STEEL RR

RUST REMOVER COAT FOR STEEL
REINFORCEMENT

Product Description :-

MCON STEEL RR is a rust treatment which helps in removing adamantly adhering rust. MCON STEEL RR removes the loose rust without losing the strength of metal.

MCON RASAYAN PVT. LTD.

Trusted Partners In Construction Chemicals

Areas of Application :-

- ✓ Cleaning of reinforcement bars in new R.C.C. structures.
- ✓ Steel-pipeline, structures, bridges, arches, etc. especially in marine environment.
- ✓ Removal of Rust from steel reinforcement during repairs of structures.

Features & Benefits :-

- ✓ Performs rust removal and rust prevention in one operation in mild conditions.
- ✓ Improves bond strength of steel with Concrete.
- ✓ Treatment can be carried out at site.
- ✓ Self-curing.

Method of Application :-

Surface Preparation :-

Good surface preparation will help MCON STEEL RR work more effectively. Remove excess rust with a stiff, bristled brush. The object of this step is to get any loose or flaking rust off rather than trying to seal it in.

Product Application :-

Apply STEEL RR with a brush or a roller. Larger surfaces are much easier to roll and brushes work well on smaller surfaces. MCON STEEL RR will dry in 20 minutes. After this again move the Wire brush to ensure removal of further rust. Once this operation is over, wash the area with Clean water to remove any traces of MCON STEEL RR.

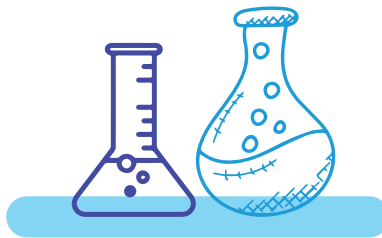

MCON RASAYAN PVT. LTD.
